Information for Immediate Release

The Little Big Roar reproduces aggressive buck grunts that you will most commonly hear during peak time of the rut. The Little Big Roar is small in size but big in sound. The Little Big Roar has a hardwood barrel, and the resonating end is made from soft rubber that you can squeeze to manipulate the sound. Now you can reproduce the aggressive grunts that bucks make when their testosterone levels are through the roof with the Little Big Roar.

Little Big Roar

Model #751

MSRP: \$21.99
